

Technical characteristics:

- 1. The enclosure is manufactured in accordance with Specifications TY БКЛ-003-2009. Enclosure material — impact-resistant, glass-filled, light-stabilized polyamide.
- 2. Built-in equipment of RRR-approved type.
- 3. Rated voltage:
  - 220 V DC;
  - 400 V AC at a frequency of 50 Hz;
- 4. Rated current, A - 6 (at 220 V AC voltage)
- 5. Degree of protection not less than IP65.

Dimensions:

| Name                               | Height, mm | Width, mm | Depth, mm |
|------------------------------------|------------|-----------|-----------|
| ПКП control and signaling station  | 115        | 111       | 74        |
| 2ПКП control and signaling station | 198        | 111       | 74        |
| 3ПКП control and signaling station | 282        | 111       | 74        |

This Type Approval Certificate does not replace the certificate issued for serial materials and products / document of the manufacturing organization containing information on this Certificate, or with a copy of this Certificate attached

This Type Approval Certificate shall cease to be valid in the cases stipulated by the Rules of the Russian River Register and the Technical Regulations on the Safety of Inland Water Transport Facilities.
